

## International Ozone Association

---

### **Thank you to water professionals**

The International Ozone Association recognizes the high quality of service and the important tasks that water professionals are providing to ensure that safe drinking water quality and quantity are not compromised during the COVID-19 Pandemic.

Professionals of the Drinking Water industry are continuing to provide the services and providing safe drinking water during these difficult times.

The importance of safe and sustainable drinking water supplies during this pandemic has critical importance. Water, sanitation, and hygiene are important factors to minimize the impacts of this pandemic.

Water System professional must have preparedness plans for potential disasters or outbreaks of disease. Water systems continue to maintain the quantity and high quality of drinking water, and making sure that trained and certified personnel are ready to deal with emergencies, having the required equipment and chemicals for the operation of water treatment plants to maintain uninterrupted operation.

Finally, thank you and stay **HEALTHY & SAFE**

Sincerely,

Dr. Saad Y. Jasim, P.Eng.  
President  
International Ozone Association
